

# WASTE PLASTERBOARD

## Incoming Quality Specification

### WE CAN ONLY RECYCLE CLEAN, DRY PLASTERBOARD

#### ACCEPTABLE:

- Plasterboard must be loose and NOT in plastic sacks.
- Plasterboard MUST be dry. Loads containing wet material may be rejected.
- Foam or insulation-backed plasterboard must be handled separately. It can be recycled but it will attract an increased charge to cover the additional processing costs. Full details and costs are available on request.

Countrystyle inspects all incoming loads. If the loads are found to be contaminated, Countrystyle reserves the absolute right to sort and charge additional costs (supported by photographic evidence) or to reject the load at the cost of the supplier.

#### THE FOLLOWING WASTE TYPES ARE NOT ACCEPTABLE:

- Asbestos or other hazardous wastes
- Rubble, tiles or general construction waste
- Wood
- Polystyrene
- Foam
- Metals
- Glass
- Plastics
- Plastic sacks
- Insulation materials
- We cannot accept plasterboard with ceramic tiles, wooden battening, cladding or insulation materials fixed to it. Such materials must be separated and removed at source.
- We cannot accept foil-backed plasterboard.
- Bagged plaster and related materials cannot be accepted.
